

# Johnny Ji

## Junior Developer

### Skills

HTML5	CSS3/SCSS
Javascript	React
JQuery	Unit testing/ Jest
Enzyme	Bootstrap
Aos Library	Firebase
Authentication	Github
Git/Terminal	

### Hobbies

**Gaming** - I enjoy gaming which has allowed me to excel in a University-wide e-sports competition where we rank in the Top 20. My favourite game is League of legends. My interest in this makes me willing and eager to learn new technologies such as C#, which is the language the game is coded in.

**Korean Culture** - I have a great interest in Korean culture, food, language, dramas and music. My interest in Korean culture has led me to study abroad at Korea University for 1 year.

### Profile

As a curious and motivated individual, my passion for tech began when I was introduced by a friend at University. Since then I have always been intrigued about programming and have always wanted to learn more. Due to my studies, I have never been able to commit to learning such a difficult and technical intensive language/course. However, despite this, I have always gone back to programming, wanting to learn more, wanting to get good and put my foot into the tech world in order to impact the technological sector. This has led me to partake in a 12-week \_nology coding bootcamp, learning a variety of front-end technologies.

### Experience-Trainee web developer at \_nology

- Agile working environment, delivering weekly sprints with daily stand-ups and weekly retrospectives.
- Highly collaborative work, working with others to deliver a client project entirely using pair programming.
- Experience with front-end and back-end. Producing personal and client projects with HTML, SCSS, responsive designs, JavaScript and React.js. Worked on the back-end by drawing data from firebase and producing authentication systems.
- Experience in test-driven development to test code ensuring it's up to standard and maintainable. This Involved static testing, jest and enzyme testing.
- Immersed in soft skills week, delivering a high-quality presentation on current tech and solutions it can provide for current or future world problems.

### EDUCATION & QUALIFICATIONS

**October 2015 – July 2019** **Aston University, United Kingdom**  
**BSc Politics and Economics, Upper Second Class**

**Korea University, South Korea**

**September 2013 – July 2015** **Mill Hill County Sixth Form**  
**A-levels**

Economics (B) Geography (C) Psychology (C)

**September 2008 – July 2013** **Mill Hill County High school**

**GCSE 10 A-C grade** - Including Maths, English, and Science

**Languages and key skills** English (native), Cantonese (fluent), Mandarin (basic)  
Moderate proficiency in Microsoft Applications (PowerPoint, Excel, Word)

**Receptionist** – Victory Services Club August 2019 – January 2020

**Admin Assistant** – The Stretch Suit January 2018- February 2018

**Customer Assistant**- Marks & Spencer work experience - June 2012
